Art Unit: 1745

# NEGATIVE ACTIVE MATERIAL FOR RECHARGEABLE LITHIUM BATTERY ELECTRODE FOR RECHARGEABLE LITHIUM BATTERY, AND METHOD OF PREPARING NEGATIVE ACTIVE MATERIAL FOR RECHARGEABLE LITHIUM SECONDARY BATTERY

Examiner: Yuan

S.N. 09/672,287

Art Unit: 1745

December 23, 2003

#### **Detailed Action**

- 1. The Applicant's amendment filed on November 3, 2003 was received. Claim 1 was amended. Claims 16-20 were added.
- 2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action (Paper No. 16).

#### Claim Rejections - 35 USC § 102

- 3. The claim rejections under 35 U.S.C. 102(b) as anticipated by Goda et al. on claims 1-4,7,8 are withdrawn, because the independent claim 1 has been amended.
- 4. Claims 1-4,6-8,16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Igawa et al. (JP 10-21913).

Igawa et al. teach a secondary lithium battery comprising a positive electrode, a negative electrode and a non-aqueous electrolyte, wherein the negative electrode is produced by coating the surface of a carbon-based material with an amorphous oxide containing one or more elements selected form Li, Ge, Sn, Pb, Sb, Bi, B, Al, Si and In. The weight ratio of the oxide to the

Application/Control Number: 09/672,287 Page 2 of 4

Art Unit: 1745

carbon-based material is preferably in the range of 80/20 to 20/80. See Abstract; Claim2; Paragraph 9.

With respect to claim 4, Igawa et al. do not specifically disclose the particle size of the negative active material. However, it is the position of the examiner that such properties are inherent, given that both Igawa et al. and the present application utilize similar processing technique. A reference which is silent about a claimed invention's features is inherently anticipatory if the missing feature is necessarily present in that which is described in the reference. In re Robertson, 49 USPQ2d 1949 (1999).

With respect to claims 6,19, both SnO and SnO<sub>2</sub> are used as the amorphous metal oxides, respectively, in the negative electrode. See Table 1.

### Allowable Subject Matter

5. Claims 9-11,13-15 are allowed. Claims 9-11,13-15 are allowable because the closest prior arts of record, Goda et al. and Yoneda et al., do not disclose or suggest the use of a fatty acid metal salt in the preparation of a negative active material for a rechargeable lithium battery, in which the fatty acid metal salt includes one or more metals selected form the group consisting of Sn, Ag, Fe, Pd, Pb, Al, Si, In, Ni, Co, Zn and Cd.

#### Response to Arguments

6. Applicant's arguments filed on November 3, 2003 have been fully considered but they are not persuasive.

Application/Control Number: 09/672,287

Art Unit: 1745

Applicant's principle arguments are

Goda et al. do not teach the presence of an amorphous metal compound in an amount of 30% wt. or less in the negative active material.

In response to Applicant's arguments, please consider the following comments.

Applicants' arguments are persuasive, however, new grounds of rejection are made based on the newly submitted information disclosure statement.

#### Conclusion

7. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on December 11, 2003 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Page 4 of 4

Application/Control Number: 09/672,287

Art Unit: 1745

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dah-Wei D. Yuan whose telephone number is (703) 308-0766. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (703) 308-2383. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
